

2024 SUZUKI GENUINE MARINE PARTS AND ACCESSORIES

THE ULTIMATE OUTBOARD MOTOR

2024 SUZUKI GENUINE MARINE PARTS AND ACCESSORIES

Please read your Owner's Manual carefully. Never operate the boat while under the influence of alcohol or other drugs. Always wear a personal flotation device when boating. Please operate your outboard safely and responsibly.

Suzuki encourages you to operate your boat safely and with respect for the marine environment.

Specifications, appearances, equipment, colors, materials and other items of "SUZUKI" products shown in this catalogue are subject to change by manufacturers at any time without notice and they may vary depending on local conditions or requirements. Some models are not available in some territories. Each model might be discontinued without notice. Please enquire at your local dealer for details of any such changes. Actual body color might differ from the colors in this brochure.

APPLICATION CHART (64-65)

SUZUKI ULTIMATE RIGGING SELECTOR

The Suzuki Ultimate Rigging Selector is a new website that Suzuki released. The website is designed to assist users in choosing which Part Number they will need for their desired application. It will help shorten users' search time and improve their search accuracy. The Suzuki Ultimate Rigging Selector currently consists of 3 sections: Rigging Matching, Parts List, and PDF.

Website Top Page

Website address: <https://www.globalsuzuki.com/marine/SuzukiUltimateRiggingSelector/>

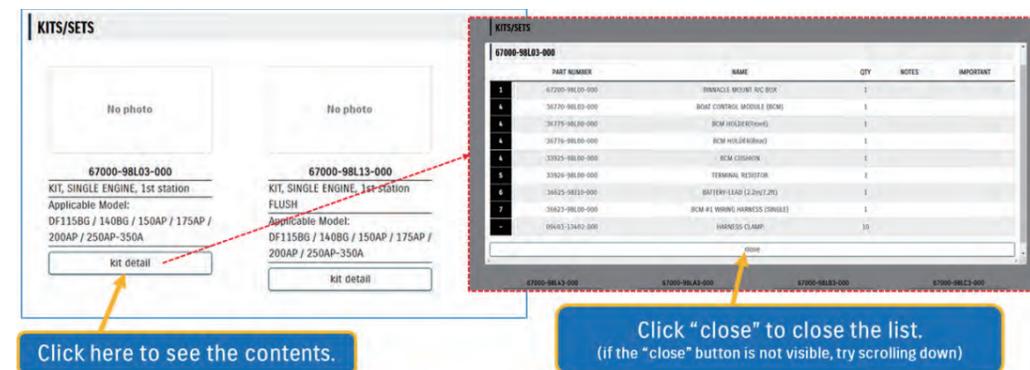

Rigging Matching

Rigging Matching section will assist users in finding the appropriate rigging combinations along with their preference. The system automatically narrows down matching results by only several clicks, and required items will be listed up like below.

Parts List

Parts List section contains a list of Part Numbers and item photos. For some kits or sets, you can check the components by clicking on "kit detail".

PDF

PDF section is mainly for items that do not fit the format of above two sections. Items in this section are easier to check in a chart.

Integrated Control System

"SYNCRE-EYE" is a comprehensive system Suzuki has developed which "connects" various devices so that they may work together in synchronization. This innovative system will also improve the control technology of the boat by "sensing" various situations surrounding the boat and be compatible with future technologies.

SUZUKI PRECISION CONTROL

Suzuki Precision Control : SPC (Drive By Wire) is a technologically advanced computer-based control system with electronic wiring that eliminates the source of friction and resistance. While you enjoy smooth throttle and shift operation, the system's computer is processing and transmitting commands in real-time to actuators at the engine that deliver precise throttle controls with smoother, decisive shifting.

Suzuki Precision Control : SPC features:

- Control of up to 6 OBM units.
- Automatic Trim available by using SMD or SMG4.

Find out more here:

Remote Control Box

- Integrated SELECT and THROTTLE ONLY switches.
- 1-lever operation for multiple outboards (Dual Top Mount).

Single Top Mount

Dual Top Mount

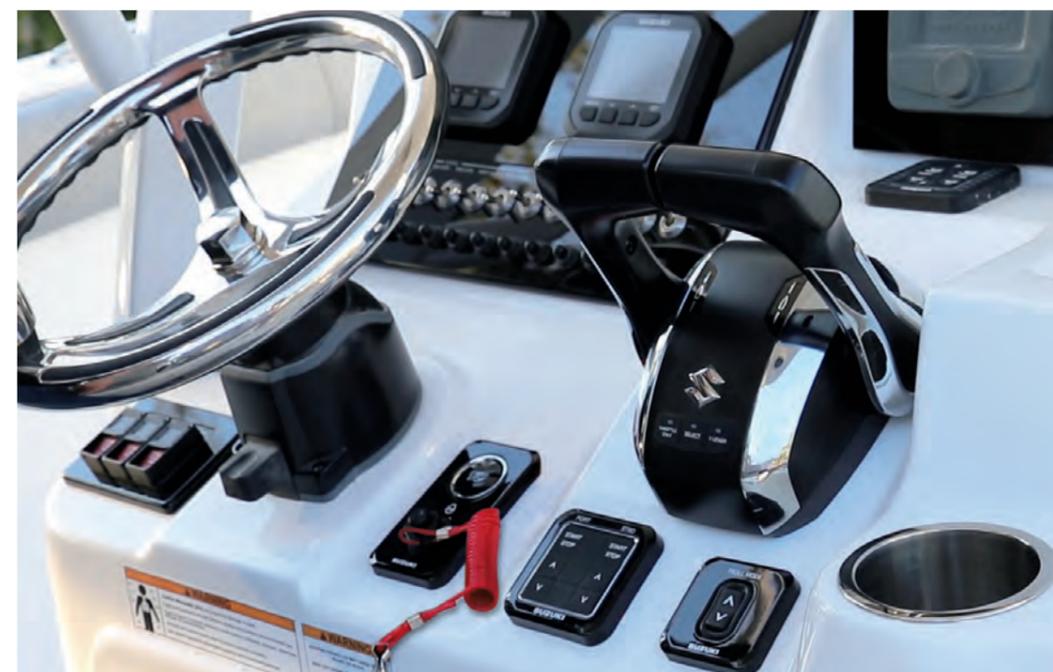

Flush Mount

Integrated emergency stop switch
(Flush Mount Only)

Switch Panels

- Mounting bolts concealed for a smooth, luxurious finish.
 - 1 action start/stop for multi-installation boats.
(Engines start in order from port to starboard)
- ⇒ See page 12 for a reference of switch panel selection.

EXTRA OPTION

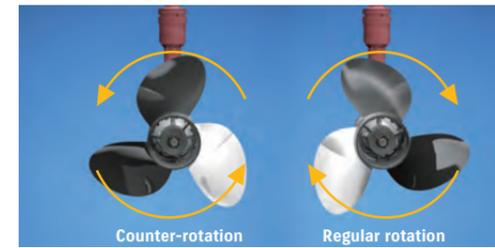

COUNTER SELECT CONNECTOR

36612-98J20-000

Applicable Model DF150AP/175AP/200AP, DF250AP/300AP

Converts to counter rotation specification.

Suzuki Selective Rotation

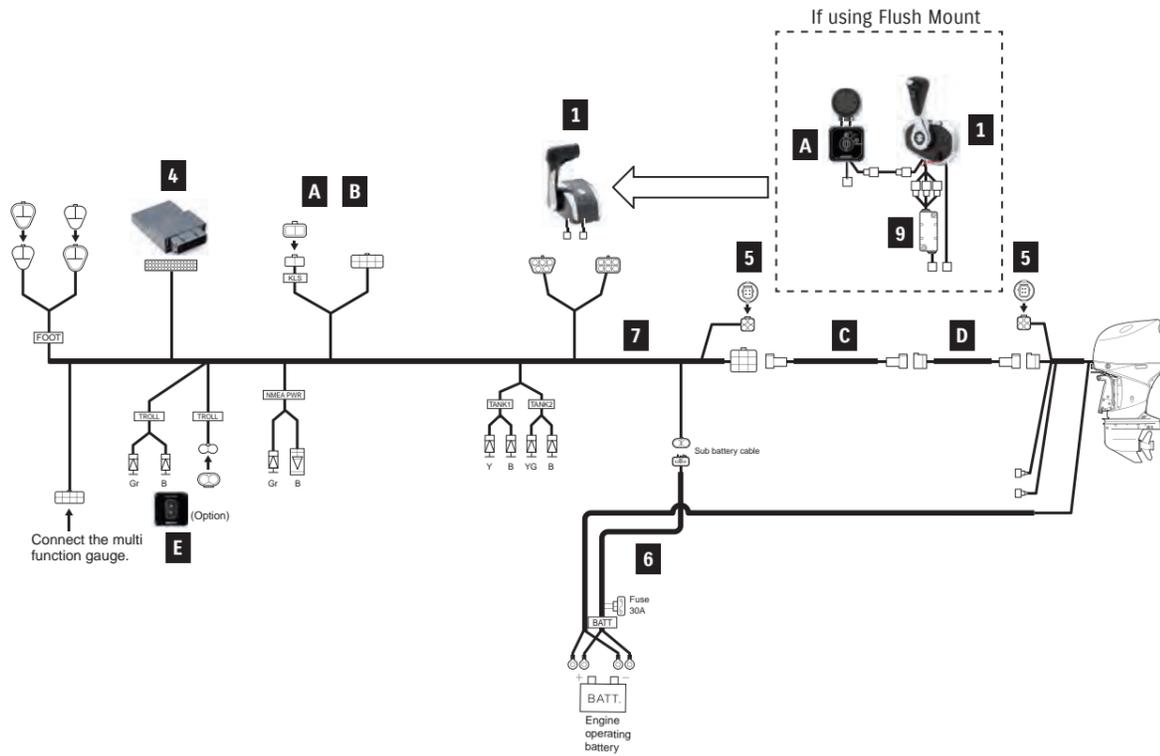

In multi-outboard installations on large boats, a counter-rotation outboard is usually paired with a regular rotation model to help keep the boat travelling on an even keel and in a straight line. Suzuki Selective Rotation eliminates the need to purchase a dedicated counter-rotation outboard by using a special switch that turns a regular rotation outboard into a counter-rotation model.

SUZUKI SELECTIVE ROTATION

MECHANICAL REMOTE CONTROL

For mechanical control models from year 2023, we introduced a new Main Wiring Harness. This harness enables CAN connection, which allows mechanical models to use functions that were previously exclusive to SPC models.

By using with the SMG4, it also enables the Automatic trim and use of the new Keyless Start System*.

Functions available using the CAN Harness

	DF40A-60A	DF70A-100B	DF100C-140B	DF150A-200A	DF200-250
CAN Connection	✓	✓	✓	✓	X
Automatic Trim	X	X	✓	✓	X
New Keyless Start System	X	✓	✓	✓	X

*If using the new Keyless Start System, please ensure to use the new switch panels.

The Keyless Start System is only available in limited regions. If you are not sure about your market, please check with your country coordinator.

TROLL MODE SWITCH PANEL

SUZUKI TROLL MODE SYSTEM

Troll Mode Switch:

An option for Remote Control models from DF40A and over, this system allows the user to adjust engine speed in 50rpm increments, giving highly precise control at low revs. With its own tachometer and control switch, it works alongside our multi-function gauges and analogue gauges.

(Tiller Handle Models from DF40A and over have Suzuki Troll Mode System as standard equipment)

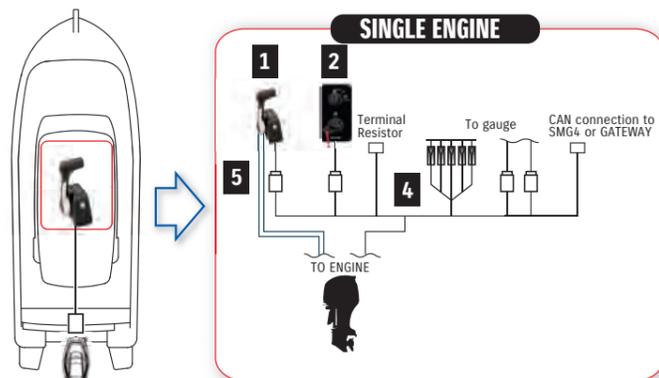

*Not Applicable for DF250/225/200, DF250W, DF150W, DF90AWQH

37860-98L00-000

Applicable Model DF40A-200A/
150AP-300AP/
300B/325A/350A

Activates SUZUKI Troll Mode
System and controls RPM
from idling engine speed up to
1200rpm at every 50rpm.

FUEL MODE

SUZUKI MULTI-FUNCTION GAUGE

The Suzuki Multi-function Gauge (SMG4) shows all the necessary information on one, user-friendly screen. Users can view a wide range of important information, including engine rpm, speed and trim angle, engine temp and fuel economy in and total fuel flow for multiple engine installations. The SMG4 also shows alerts from the engine's sensors and warning systems.

ANALOGUE TACHO & SPEED MODE

TACHO MODE

TROLL MODE FUNCTION

• Allows you to control your troll mode from the Multi-Function Gauge

This function is available from year 2019 models. Can only be used by models which are adapted to troll mode.

* Speed sensor or GPS module required.

	GPS Module	Speed sensor

FishHunter™ Drive

FishHunter™ Drive

The FishHunter™ Drive is a feature for Furuno NAVpilot-300 Autopilot, developed exclusively for Suzuki Drive-By-Wire engines. With a simple software update, it offers enhanced autopilot and engine controls which anglers will find highly valuable while jigging or trolling. It is available for configurations of up to 4 engines.

The following items are required to use the FishHunter™ Drive:

Supplier	Product		Note
SUZUKI	Outboard Motor (DBW models from Year 2022)		
	Gateway	34923-96L13	
	Boat Control Module (BCM)	36770-98L04	Included in the DBW kits. See pages 10-17.
Furuno	NAVpilot-300		
	SATELLITE COMPASS™ / GPS + Heading Sensor		
	Furuno multi function display		Display is required for Route Smoothing™.

FEATURES

Speed Control

The boat will maintain a preset speed by adjusting engine RPM.

Route Smoothing™

Automatically controls the speed at waypoints for smooth turns while navigating a designated route. On approach to the final waypoint, the boat will slow down and activate Point Lock™ automatically to hold on the destination.

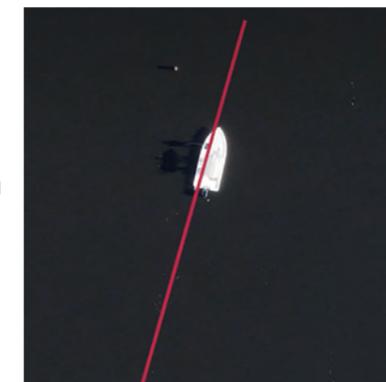

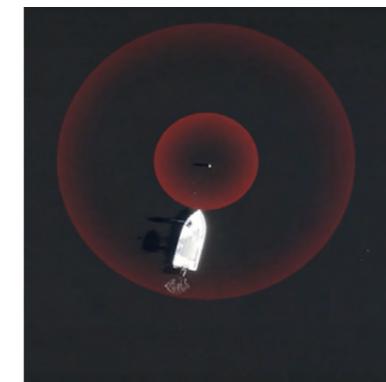

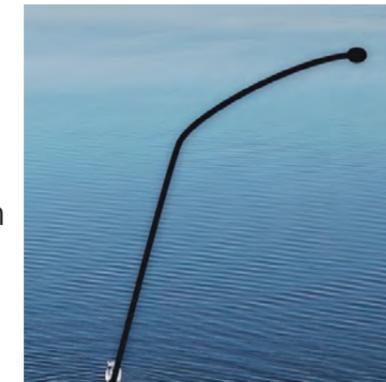

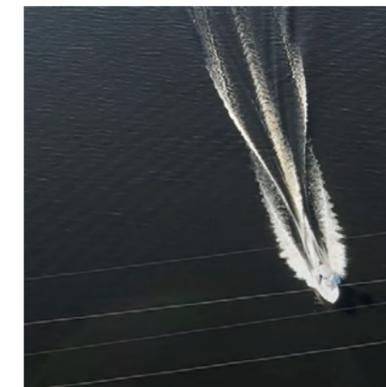

Point Lock™

Allows the vessel to easily keep a fixed position by controlling the steering and shift, limiting the effects of wind and current.

SABIKI™ Lock

Expands upon the NAVpilot-300's SABIKI™ function by controlling both the steering and throttle to maintain stern direction, freeing the angler to focus on jigging and other vertical fishing.

SUZUKI DIAGNOSTIC SYSTEM MOBILE PLUS

The Suzuki Diagnostic System Mobile Plus (SDSM+) is an app that combines the existing functions of the former SDSM app with new, unique features to support our customer's marine life and experience. With a few screen taps and a simple QR code scan, this app guides customers from boat day planning, all the way to their next maintenance session. The SDSM+ is free of charge and available for anyone with a working smartphone.

What can SDSM+ Do?

- Provide boating condition forecasts all in one screen.
- Guide customer through pre-departure inspection.
- Receive and display engine condition by scanning a QR code. The app also allows the customer to send this data to their dealer by e-mail.*
*SMG4 (Page 34) or SMD is necessary for this feature.

Find out more at global website here! →

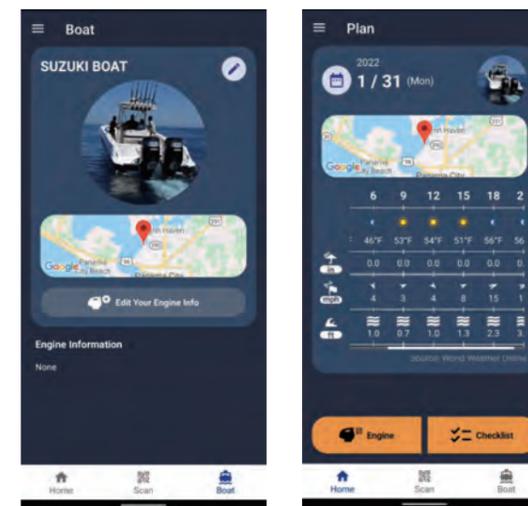

Or go to https://www.globalsuzuki.com/marine/sdsm_plus/

*QR Code is a registered trademark of DENSO WAVE.

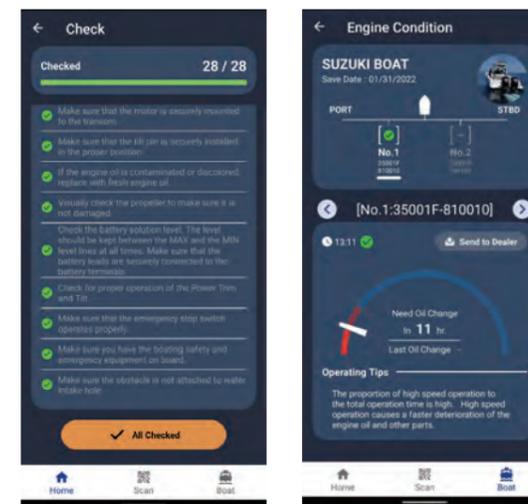

Before the departure day

Customer will first register their boat and engine(s) information on to the app. Then, customer can select a boating date and destination to check the weather forecast.

On the departure day

The app will show a pre-departure checklist to inspect the boat and engine(s). Customer can also scan the QR code on the SMG4 or SMD to check engine condition data. The app will also provide operating tips based on piloting tendencies.

After the boating

Customer can scan the QR code again to check the latest engine condition. After checking, the customer can e-mail the data to an authorized Suzuki dealer. The dealer can use this data to prepare for the customer's next maintenance session.

The SDSM+ app is subject to updates and other changes. Images on this catalogue may differ from the actual screen.

65700-94440-000

with fuel filter (gasoline)

Applicable Model DT9.9AK/15AK/40WK

65700-94434-000

with fuel filter (kerosene)

Applicable Model DT9.9AK/15AK

Only for P36 ver.

FUEL-HOSE COMPONENT

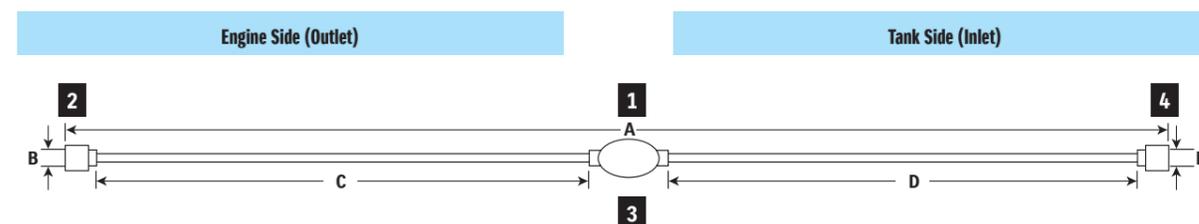

(US-EPA compatible.)

65700-87J28-000

Applicable Model DF5A-30A

65700-88L06-000

Applicable Model DF40A-60A

SUZUKI PROPELLERS

WATERGRIP

WATERGRIP is a stainless-steel propeller series offering accurate response to User operation. Converting engine power into propulsion with high efficiency, this propeller series meets our customer's demand for bigger, faster, more powerful outboards. The WATERGRIP propeller series employs a new interchangeable and square shaped propeller bush that minimises power loss in delivery.

*This picture was taken remotely

WATERGRIP

The WATERGRIP series will be the new standard for Suzuki propellers. The interchangeable square-shaped bush system is designed for quick and easy replacement when required, and also accurately and efficiently converts power from the engine to thrust through the propeller.

WATERGRIP DUAL

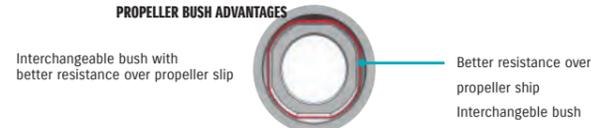

Our flagship models, the DF350A, DF325A and DF300B, introduced the Suzuki Dual Prop System, an industry-leading technology, which delivers outstanding and exciting performance. The two contra-rotating propellers, operating simultaneously, enables greater conversion efficiency as well as better stability, grip, and manoeuvrability.

WATERGRIP SPORT

The WATERGRIP SPORT propellers feature a high rake blade design for excellent acceleration and exceptional top speed. These propellers are ideal for lightweight sports boats as they give remarkably stable thrust when turning for superior manoeuvrability.

Choosing The Right Propeller

Propeller selection is very important in the performance of the boat. Acceleration, speed, fuel efficiency, stability and engine RPM all are affected by the propeller. Operating requirements and conditions will also determine which design, style and pitch of the propeller your customer can choose. The combination of boat, engine and appropriate propeller size may have already been tested by the boat manufacturer.

Your Customer may need your assistance to determine the correct propeller for their application.

Stainless Steel Propellers

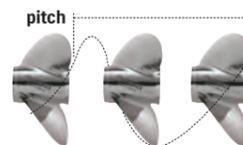

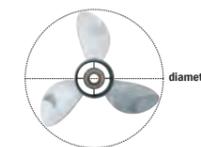

Suzuki Stainless Steel Propellers offer high performance and durability. Their aggressive design enhances the overall performance of the boat and the durability of stainless steel ensures long term dependability. Suzuki Stainless Steel propellers are also fitted with a rubber cushion hub to help absorb vibration and shock should they strike a foreign object.

Propeller Sizing

When referring to propeller size, the first number is the number of blades, the second number details the **diameter** of the propeller, and the third number is the **pitch**. Example: **3 x 13 x 18** = 3 blades x Diameter: 13 inches x Pitch: 18 inches. The pitch is the most significant factor when choosing a propeller.

Diameter

Diameter is the distance across an imaginary circle that is made when a propeller rotates. Diameter is determined during the designing process of a propeller and is usually based on engine size, gear case design, horsepower and speed.

Pitch

Pitch is the theoretical distance that a propeller corkscrews forward through the water. In theory, an 18" (457.2mm) pitch propeller would travel 18" (457.2mm) with each complete revolution*.

Lower pitches accelerate faster, but have lower top end speed. Higher pitches have a slower acceleration, but attain higher top speeds. An inch of pitch is generally equal to 150-200 engine RPM at wide open throttle (WOT). If pitch increases by an inch, RPM will decrease by 150-200 RPM at WOT. If pitch decreases by an inch, RPM will increase by 150-200 RPM at WOT.

*Note during actual operation, this number will be affected by slip factors such as water conditions, boat weight, propeller style, etc.

MAINTAINING YOUR SUZUKI

OBM ENGINE OIL ECSTAR V7000 SEMI-SYNTHETIC

99000-26310-400
ECSTAR V7000 4T 10W-40(4Lx4pcs)

Suzuki Motor Corporation (Japan) Products
Metal can with a cap

◆ FEATURES

- Help to protect engines in severe conditions.
- Contribute to improve engine response.
- Viscosity index improvers help engine start easily.
- Advanced detergents keep engine parts clean.
- Special additives help protect engine in both salt and fresh water environments.

OBM ENGINE OIL ECSTAR V5000 MINERAL

◆ FEATURES

Premium oil that has been designed especially for Suzuki marine engines does not only end with ECSTAR V7000. To meet your demand, we have set ECSTAR V5000. High quality based oil gives your four stroke outboard engine an outstanding performance for wear protection, viscosity stability, low volatility and excellent protection against rust and corrosion.
